

# Property Evaluation Matrix

## Chapter 10.3: Understanding Home Buying

### Instructions

This evaluation matrix will help you systematically compare different properties based on financial, location, property, and lifestyle factors. For each property you're considering, assign a rating from 1-5 for each factor, where 1 is poor/unacceptable and 5 is excellent/ideal. You can also adjust the weight of each factor to match your personal priorities.

### Rating Scale Guide

- **5 - Excellent:** Exceeds expectations, ideal situation
- **4 - Good:** Above average, meets needs well
- **3 - Acceptable:** Meets minimum requirements, average
- **2 - Fair:** Below average, has significant concerns
- **1 - Poor:** Does not meet needs, unacceptable

For **Weight**, assign a number from 1-5 based on how important each factor is to you personally:

- **5 - Critical:** A must-have, deal-breaker factor
- **3 - Important:** Significantly influences decision
- **1 - Minor:** Nice to have but not essential

## Evaluation Summary

### Weighted Score Calculation

For each factor, multiply your Weight (1-5) by your Rating (1-5) to get a weighted score. Then sum all weighted scores for each property and divide by the sum of all weights to get a final score out of 5.
