

# Design Your Business

Activity 4: Create a complete business plan using all four factors

## Instructions

Design a business that efficiently uses all four factors of production with realistic estimates.

1. Name your business and select a business type
2. Describe the problem your business solves
3. Plan your requirements for each factor (land, labor, capital, entrepreneurship)
4. Create a revenue model with pricing and sales volume
5. Evaluate your business plan to see if it's viable

## Step 1: Business Concept

Business Name:

Business Type:

What problem does your business solve?
