

Your Personal Factor Contribution

Activity 3: Calculate how YOU contribute to the economy

Instructions

YOU are a factor of production! Calculate how you currently (or will) contribute to the economy and earn income.

1. Enter your current job or target career and hourly wage
2. Input hours worked per week
3. Check all human capital investments that apply to you
4. Enter current savings amount and interest rate
5. Calculate your total economic contribution

Your Labor Contribution

Current or Target Job:

e.g., Retail sales, Software engineer

Hourly Wage (current or expected):

\$ 15

Hours per Week:

20

Your Human Capital

Check all that apply:

- ☐ High school diploma
- ☐ Some college

- ☐ Associate's degree
- ☐ Bachelor's degree (planned)
- ☐ Professional certifications
- ☐ Specialized skills training

Your Capital Contribution (Savings)

When you save money, you're providing capital to the economy. Banks lend your savings to businesses!

Current Savings:

\$ 500

Interest Rate (APY):

4

%

Annual Interest Earned:

\$ 0
